TAKING UP LANDS ALONG NEW ROAD

People Have Faith in the Los Angeles Project.

LOCATE 18,000 ACRES

DEEP CREEK ROAD MAT BE BUILT FIRST.

Within the present week two corps of government surveyors, numbering in all twenty-five men, will be at work in southern Nevada along the supposed line of the San Fedro, Los Augeles & Salt Lake road. Since it was definitely announced that the road would be built so many locations have been filed on government land in the vicinity of the supposed route that the government has been forced to make surveys of vast tracts that have never before been truched by a compass tripod. Colonel H. B. Maxson of Reno, Nev., who will have charge of the work, came in from Nevada last evening, registering at the Kenyon. He had a conterence with C. O. Whittemore, general counsel for the Los Angeles road, last evening. Colonel Maxson will spend today and perhaps Maxson will spend today and perhaps tomorrow in Sait Lake, and will then start out for Uvada and work across the country with his assistants.

start out for Uvada and work across the country with his assistants.

"Since Jan. 1 there have been 18,000 acres of public land filed on." said Colonel Maxson. "The people feel confident that this road is going through, and consequently they are taking up land that otherwise they wouldn't look at. Nearly all those who are getting in on this irnd are from California, although there have been a few locators from Utah. Most of it is sultable only for grazing, although irrigation will make it fertile. There is plenty of water for a large section of the land, if it is properly used, too. I expect to be in the field in southern Nevada for some time now."

some time now."
Colonel Maxson is secretary of the
Nevada State Association of Civil En-General Counsel Whittemore of the

Los Angeles road says the principal of-ficials of the road are discussing going over at least a portion of the route this month to familiarize themselves with

month to familiarize themselves with the conditions.

"The directors will meet in the middle of the month," said Mr. Whittemore, "and the plans will probably take tangible shape then. The idea is to go over the country and see exactly what there is, without being obliged to take the information second-hand. It is wholly uncertain yet who would go."

"I should have to be counted out of

"I should have to be counted out of a trip like that," said W. S. McCornick. "I shouldn't exactly fancy the idea of going a ross the country horseback." Line to Deep Creek.

Mr. Whittemore says that the Deep Creek line is likely to be completed and in operation long before the entire road

is finished.

"If the route over west of Tooele is finally chosen, that would bring the line within about sixty miles of Deep Creek," said Mr. Whittemore. "It would then be an easy matter to build over to Ibapair and get the tonnage that is sure to develop from that region. That is probably what will be done. The time of starting work of construction from this end depends largely on the result of the controversy over over to Ibapair and get the tonnage that is sure to develop from that region. That is probably what will be done. The time of starting work of construction from this end depends largely on the result of the controversy over the old grade in Nevada. We expect a decision from the register of the land office in Nevada within the next month. Either part, can then appeal, and the case will have to go to the commissioner of the general land office, and then to the secretary of the interior. This may carry the matter well on into the summer or even the fall."

The surveyors are working west of Uvada, following along the old grade. No report is expected from them for a couple of weeks.

Regarding the possibilities for building down into the St. George copper region. Mr. Whittemore said:

"It looks to me as if the prospects were for the continuation of the Utah & Arizona line from Kingman and Chloride across the St. George country and up to a place where it will connect the continuation of the Utah & Barbara in the content of the cont

with the San Pedro, Los Angeles & Salt ake. The Santa Fe and the Los An-eles line are not unfriendly, as has eeen stated."

WARM SPRINGS GUSHER.

New Hot Spring That Caused Some

couple of days ago, and has since been flowing loward the road. At first it came near starting an in-cipient oil excitement. Then it was found to be warm mineral water, and the report spread that a small geyser had suddenly broken forth from the

Crowds gathered to watch the water course downward and to speculate on "We'll have another Yellowstone park before long." said one.
"There's likely to be more of these break loose, and a man could make money building a sani'arium here."

But there was no foundation for all these air castles. It was said later that the pipe that conveys water to the san-itarium down-town had burst, and that this was the cause of the new "spring."

MR. CANNON'S ILLNESS.

Telegram Last Night Announced That He Was No Better. The family of President George Q.

Cannon waited patiently all yesterday cannon water patiently all yesterday to hear some encouraging news from the bedside of the church leader, who lies critically ill at Monterey, Cal., but no word came to cheer them. Naturally, the family were very apprehensive, knowing that his physical condition is on the verge of collapse from nervous prostration and insomnia. About 9 on the verge of collapse from nervous prostration and insomnia. About 9 o'clock a telegram was received from General John Q. Cannon announcing that his father was no better. This announcement signified that John Q. together with his brother, Hugh J., and his cousin, John M. Cannon, the attorney, had arrived at the sick hed in research to the summers that cannot be approximated by the summers that the sick had a rethem on Friday. The family had hoped for better news, but they can now only wait, hoping for the best.

MAIL CARRIER STRICKEN. Brigham L. Morse One of Yesterday's

Smallpox Victims. Brigham L. Mørse, the well known mail carrier, is down with smallpox at his home, 659 South Second West street. home, 659 South Second West street. When his home was placed under quarantine Le confessed that he had never felt so sick. He thought he had the grip, and v.as so weak he could not stand up. It is regarded as quite certain that Morse contracted the disease either while handling mail matter or in delivering letters to some house where it was not known that smallpox existed.

The other case of smallpox reported resterday was that of John Metters, aged 21, residing at 90 M street. Maters, like Postman Morse, has never been vaccinated.

emated. Several of the cases under quarantae in the city and at the isolation hospital are reported by the physician in charge to be very severe, and he expects that the death list will be inevitably increased.

The complaint that patients at the city's smallpox hospital are permitted to The complaint that patients at the city's smallpox hospital are permitted to roam beyond the limits of the quarantined

Farmer Hickorynut—"Mirandy, in that 'ere hog I killed this mornin' I found a five-dollar gold piece."

Aunt Mirandy—"Wal, I always did say thar were money in hogs."

premises, and that they have been allowed to wash their c'othing in Parley's canyon creek, was finvestigated yesterday by Dr. Scott, and last evening the quarantine physician declared unequivocally that there was no truth whatever in the report.

"If Constrible Chapman would attend to his duties instead of shooting off his mouth about what he knows nothing," suggested the physician, "he would be doing the public a good service. I am certain that those whom the constable thought were patients at the smallpox hospital violating the quarantine regulations and doing laundry work in the canyon creek, are the hobos who have been camped in Parley's canyon hollowsfor several days, and are still there. There can be no doubt that they are a nuisance and they should be arrested and jailed. I telephoned the police department to look into the matter, but I was told to complain to the sheriff's office. I could get no answer, but will try to get the sheriff to act today."

Explaining further, Dr. Scott declared that it is preposterous to think of a smallpox patient with tender face and hands washing in the cold canyon stream, especially when the hospital is provided with a laundry and bataing facilities where warm water is at hand.

MRS MOORE ARRESTED

MRS. MOORE ARRESTED.

Resisted Officer and Was Jailed for Creating Disturbance.

Mrs. Henry Moore was arrested yes terday afternoon and placed in jail for disturbing the peace. Officer Sperry's disturbing the peace. Officer Sperry's attention was attracted by loud and bolsterous language in a rooming house at 80 South State street, and an investigation found Mrs. Moore to be responsible for all the trouble. She resisted arrest and for a time made matters interesting for the policeman. The latter, however, soon induced the woman to accompany him to the station, where she was locked up.

HOTEL GOSSIP.

Rev. William J. Stone of Nitenat, B. C., a Methodist missionary among the west coast Indians on Vancouver island, spent Sunday in Salt Lake, registering at the Walker.

the gives away perhaps \$200 to \$300. From other pot-latches he may get back during the year \$2 to 3, so you see it is a losing game. The Indians are intelligent—more so than those you have around here, and they are becoming better educated. Most of them are sailors and salmon fishers, and they are learning to be thrifty. The Methodist church now has twenty-three missions along the coast, and other denominations are also working in that field.

New Hot Spring That Caused Some
Excitement.

About a block north of the Warm
Springs, on the east side of the road,

Thomas D. Rees of Wales and James A. Melville of Millard are at the White House. They are here to attend the meeting Tuesday of the state land board, of which they are members.

H. Chapin, jr., cashler of the National Bank of North America at New York, is a guest of the Knutsford.

George Francis Train, jr., son of the celebrated George Francis Train, is at the Knutsford. Unlike his father, he is not an agitator, but a plain, unassuming traveling man, with headquirters at San Francisco.

Taveling man, with headquarters at San Francisco.

HONOR LAWTON'S NAME.

Grand Plaza in Philippines to Be Changed to Lawton Plaza. Louisville, Ky., March 31.—The Commercial says: The town council of Vigan, South Ilocos island, has ordered the name of Grand Plaza of the city to be changed to "General Lawton Plaza."

Senator Pettus' Son.

(Washington Post.)

"Senator Pettus for his only son, Francis L. Pettus of Selma, Ala., two weeks ago, a promising young Democrat, who, had he lived, would probably have succeeded his father in the upper branch of congress," said Mr. Robert R. Poole of Montgomery, state commissioner of agriculture, at the Raleigh, "The son was truly Senator Pettus' right arm. He had had long service in the Alabama legislature, was speaker of the last house, and previous to that had had a term as president of the state senate and also as speaker of the house. It is doubtful if there was a Democrat in the state who wielded a greater influence in our politics."

A Little Fable.

A Little Fable.

(Baltimore American.)

There was once an Astute Manager of a Dramatic Company, which was playing to about Ten Dollars a Night.

Now the Astute Manager argued to Himself: "There will have to be something Doing here pretty Suddenly, or it will be a Case of Hie to the Friendly inn for we cannot eat Papier-mache Turkey."

So he put out the S. R. O. sign and Refused to let any one into the Theatre that Evening.

Next day there was a Line of People reaching from the Box Office to the edge of Town.

Moral: If you earry Something besides Moral: If you earry Something besides Hair under your Hat you do not need to Dramatize a Novel or take Milk Baths.

Priscilla in Lent. Priscilla puts her pleasure by,
Forgets each worldly lure;
The heavenly azure of her eye
Grows downcast and demure,
If I were asked to limn a saint,
Hers are the features I would paint.

Her gowns are all of somber shade (How well she looks in gray!)
To charity this winsome maid
Devotes the Lenten day;
And where she moves there breathes ar Of joy that is itself a prayer.

Forsooth what has she to repent,
Unless, perchance, it be
That every twilight-tide in Lent
She consecrates to me?
But this is missionary work;
Priscilla does not shun nor shirk.

Accumulated excess of the first of the usually extensive undertakings in the way of reconstruction which have been set on foot since his advent, and to which he has given very much of his own skill as a railroad builder. In a word, he has devoted himself entirely to the accomplishment of the work he was given when he came to Omaha in the winter of 1897.

Horace G. Burt was born in January, 1849, at Terra Haute, Ind. His education was received in the common schools and a short attendance at the University of Michigan. He left the latter institution without having taken his degree and entered dinto the practice of what has proven to be his lifetime work. About a year ago the university conferred on Mr. Burt the degree of M. E., which he would have won had he been regularly graduated.

Stephen Crane's Lurid Inspiration.

whose operation some thousands of men are employed, Horace G. Burt keeps very much to himself. His reti-cence has won for him the name of be-

est order.

It was not a great while until Mr. Burt was again transferred from the construction to the operating department, and he was made general superintendent of the Iowa lines of the Northwestern, with headquarters at Boone. From there he came to Omaha, to be eneral manager of the Fremont, Elkhorn & Missouri Valley road, serving for five years in this capacity. From here he was sent to St. Paul to be general manager of the Chicago, St. Paul, Minneapolis & Omaha road. He had hardly assumed this position before he was made assistant to the president—Marvin Hughitt—and third vice pres-—Marvin Hughitt—and third vice president of the Chicago & Northwestern-This is briefly the railroad career of Mr. Burt prior to his return to Omaha Mr. Burt prior to his return to Omaha to assume his present position. Such a hasty outline can give no adequate idea of the work he performed or the results he secured, more than will be gained from the fact that his upward course never halted. It will be accepted as proven that he must have shown both ability and capacity, or he could not have attained the confidence of the managers of the great system of railroads with which he was connected, for mere pull does not win recognition and mere pull does not win recognition and advancement in the railroad service.

On Monday, Dec. 27, 1897, it was officially announced from New York that

Signtles.

The water boundary at the extreme western end of the line was settled in a treaty proclaimed Aug. 5, 1846, and defined by Emperor William I of Germany, as arbitrator, in ISI, as extending from Point Roberts through the waters of Georgia, Haro and Juan de Fuca stratist to the Pacific ocean. He decided in favor of the United States.

The actual survey of the land portion of this northwestern boundary, which is 410 miles long, was undertaken about 1856 by a joint commission. The Americans on the commission included Archibald Campbell as commissioner, and the late General John G. Parke, as astronomer and surveyor. They did not actually begin work till the summer of 1857. There was a large party of scientists and others attached to the commission. The commissioners of the two countries found it inexpedient to cut a track through the dense forests, because of the great expense, the consumption of time, and the impracticable nature of the country.

The was agreed to designate certain as-It was agreed to designate certain astronomical stations along the boundary, within a half mile of which on either side a track not less than twenty feet in

Our Growing Silk Industry.

Our Growing Silk Industry.

(Leslie's Weekly)

It was the current belief only a few years ago that the silk industry could never be a success in the United States. It was thought that in this line of trade we could never hope to compete with France and other European countries. Climatic conditions and other natural causes were supposed to be against the development of the silk business here. But facts and figures now tell a different story. Even the French trade papers, according to one of our consuls in France, concede that the United States is likely to take the lead among the silk producers of the world. During the last three years the consumption of raw silk in the United States has exceeded that of France. One trade paper says the producing power of the United States has exceeded that the constant that the constant is the constant of the United States has exceeded that the constant that the constant is the constant in the constant is the constant in the constant in the constant is the constant in the constant in the constant is the constant in the
